REFUSES \$5,000

Dr. Friedmann Is True to His Promise to Government Officials.

[Special to The Times-Dispatch.] New York, April 4.—Dr. Friedrich Franz Friedmann has refused an offer of \$5,000 for a single injection of his serum, regardless of the result, ac-cording to W. E. D. Stokes and Asa Gardiner. This offer, Stokes declares, was from a very prominent man, not a resident of this city, whose wealth is estimated at \$20,000,000.

This unnamed millionaire has made three trips to New York during the past three weeks, the story runs, and has pleaded with Dr. Friedmann for a single injection of the famed turtle single injection of the famed turtle serum. The man is said to be suffering from tuberculosis in its early, stages, and the reason for Friedmann's rejection of the offer was that he has agreed with the United States Marine Hospital Service officials not to accept any patients other than those of their choosing. choosing.
Colonel Gardiner, it was learned to-

night, is now engaged in working out the details of a plan for the distributhe details of a plan for the distribution of the Friedmann cure to doctors over the country, so that the public may get the benefit of the discovery and Dr. Friedmann still keep control of his secret process. This much was admitted by Colonel Gardiner, though he denied that the formation of a syndicate was being considered or that W. E. D. Stokes had anything to do with

physicians from all parts of the country will be instructed in the use of the Friedmann serum. Dr. Friedmann will insist that these men be of recognized standing in their profession. When they have learned the use of the serum they will be permitted to control its distribution in their own territory, and tone in turn designate physicians. and may in turn designate physicians whom they will instruct and employ

whom they will instruct and employ as their aides.
Of course, all these arrangements are contingent upon the result of the government observation of patients now under treatment and the ruling of the patent application which has been field at Washington.
Dr. Friedmann has been advised that the only way be considered.

that the only way he can ethically make money out of his discovery is by dealing directly with physicians. It is stated emphatically that he will have no dealings with any drug syndi-cate and will not permit the formation of a syndicate to market his remedy.

Board to Place Valuation on Roanoke Water Company Property.

Roanoke, Va., April 4.—The board of appraisers, organized last July for the purpose of placing a valuation on the property of the Roanoke Water Company and to draft a new franchise for the company based on their findings, has been in Roanoke since Thursday last. Dabney H. Maury, of Chicago, met joint aldermanic and Council Committees on Fire and Water and Ordinance Monday and gave notice that the appraisers expected to render their report about April 15.

The board is made up of William Wheeler, of Boston, selected by the water company; Mr. Maury, seeketed by the city, and Wynkoop Kiersted, of Kansas City, as the third member, selected by the other two. Charles A. Allen, of Worcester, Mass., one of the original board, died late, in 1912, this fact delaying the work of the board to some extent.

laying the work of the board to some extent.

Messrs. Kiersted and Wheeler came to Reaneke March 27 to join Mr Maury, but the Chicago member was delayed on his trip by railroad washouts and did not arrive in Roaneke until Sunday. The three engineers left the city Tuesday night. All members of the heard are hydraulic engineers of wide reputation. In the organization of the board it was agreed that the city should pay the expenses of its member, the water company taking care of the man they selected, while the expenses of the third man are to be paid by the city and water company jointly. Under the findings of the board the city will have the right to take over the water system at its appraised value, or proceed to advertise for a new franchise. SUPERVISORS DECLINE BIDS.

When it is remembered that of this number of hens over a half dozen were setting for over a week in March, this is a splendid showing. Can any other county bent it? In this connection let it be said that a small flock of hens of good breed, well attended to, is better by far than a large number of inferior quality and not well attended to. There is such a thing as intensive chicken and erg-raising as well as intensive farming, and in both it pays.
